

# MUHAMMAD ASHRAF BIN AMRAN

Port Dickson, Negeri Sembilan | 013-8259195 | muhammaddashraf.official@gmail.com | linkedin.com/in/muhammad-ashraf-731bb0291 | github.com/Asshhhrf-stack

## SUMMARY

Dedicated undergraduate pursuing a Bachelor of Computer Science with Honours (Information Security and Assurance) at USIM, with hands-on experience in website and mobile development. Actively seeking full-time opportunities as a Full Stack, Backend, or Frontend Developer following the conclusion of my internship in August 2026. Experienced with Laravel, Angular, MySQL, MSSQL, Flutter, and Android Studio. Thrive in collaborative environments, enjoy problem-solving, and am eager to learn new frameworks and technologies to stay current with industry trends.

## EDUCATION

**Bachelor of Computer Science with Honours (Information Security and Assurance)** | Aug 2022 - Oct 2026  
Universiti Sains Islam Malaysia (USIM) | Current CGPA: 3.57

**Sijil Matrikulasi Malaysia** | 2021 - 2022  
Kolej Matrikulasi Negeri Sembilan | CGPA: 3.83 | MUET Band: 4

## INTERNSHIP EXPERIENCE

**Software Engineering Intern, Telekom Malaysia Research and Development** | Mar 2026 - Aug 2026  
Backend Development

- Version Control Management: Managed source code repositories via GitLab, establishing structured feature-branching strategies to facilitate a clean development workflow.
- Agile Collaboration: Actively participated in an Agile environment, collaborating in Sprint Planning, Daily Scrums, Sprint Closing, and Sprint Reviews alongside technical leads and project owner.
- Full-Stack Feature Engineering: Engineered core security and authentication modules from scratch using the NestJS framework, establishing primary logic for secure code generation and request validation endpoints.
- Framework Migration & Refactoring: Led the technical migration of backend architectures from legacy Express.js to NestJS, leveraging dependency injection and modular design principles to improve service scalability.
- Database & Token Security: Restructured relational database schemas via MariaDB table alterations, implementing token-based authorization (JWT) and custom validation middleware to mitigate session replay attacks.
- Enterprise Gateway Integration: Adapted existing notification architectures to implement reusable backend services, integrating them directly with enterprise communication gateways (OIP TMRND) for automated system messaging.
- Data Modeling & Payload Validation: Mapped complex database entity relationships using TypeORM and enforced strict request validation via Data Transfer Objects (DTOs) to secure sensitive client-side data.
- RESTful API Architecture: Designed and implemented scalable RESTful APIs from scratch using NestJS and Express.js, adhering to proper HTTP methods, status codes, and clean routing structures.

### Frontend Development

- Angular UI Component Development: Designed and built highly reusable frontend components in Angular, including secure user input forms, interactive feedback triggers, and dynamic modals.
- Routing & UX Standardization: Implemented frontend routing mechanisms to ensure seamless application navigation transitions while maintaining consistent typography and corporate branding color palettes.
- UI/UX Optimization & Hotfixing: Diagnosed and resolved layout and styling regressions post-merge, and optimized frontend performance by removing unused component lifecycle hooks to improve maintainability.

## WORK EXPERIENCE

**Part-time Crew, McDonald's** | Aug 2023 - Sep 2023

- Executed daily operations including order taking, cash handling, and food preparation, maintaining high standards of quality and service.
- Managed customer flow during peak hours, ensuring efficient service and a positive dining experience.

**Part-time Crew, KFC** | Aug 2022 - Sep 2022

- Processed customer orders accurately and efficiently using the point-of-sale (POS) system.
- Prepared food items following standard recipes and presentation guidelines.

## PROJECTS

---

### **AI-Powered System for Personalized Learning & Career Guidance via Psychometric Assessments** | *Final Year Project*

*Role: Full-Stack Developer*

- Developed a full-stack web application using Dart for both frontend UI and backend logic to ensure seamless system integration.
- Integrated Google Generative AI to analyze psychometric data, delivering personalized learning paths and tailored career recommendations.
- Architected data storage and privacy controls using Firestore and secure authentication to guarantee data safety and robust access management.

### **Open Source Intelligence (OSINT) Security Toolkit** | *Semester Project*

*Role: Full-Stack & Security Engineer*

- Application Development: Designed and built a security monitoring application from scratch, incorporating multi-layered system architectures to handle real-time data processing.
- Threat Intelligence Integration: Implemented real-time threat detection capabilities by integrating open-source intelligence (OSINT) APIs, including HaveIBeenPwned, Hunter.io, and Shodan.
- Device Integrity & Hardening: Developed advanced device integrity checking mechanisms within the application to actively detect rooted, jailbroken, or otherwise compromised operating systems.

### **Sport Centre Management System (Security Audit)** | *Semester Project*

*Role: Full-Stack & Security Engineer*

- System Engineering: Designed and developed the core application architecture from scratch, implementing secure user authentication pathways and data access management features.
- Security Compliance & Audit: Performed an information security audit on the developed system based on ISO/IEC 27001:2022 standards.
- Risk Assessment: Checked compliance with Telecom Data Protection Policies and identified key security vulnerabilities within the application layers.

## AWARDS & CERTIFICATES

---

### **ISTQB Certified Tester Foundation Level (CTFL) - Malaysian Software Testing Board (MSTB)** | *April 2026*

- Accredited by International Software Testing Qualifications Board. Certificate Number: MY0054-26.

### **Dean's List Award**

- Awarded for outstanding academic performance in the program for Semester 4, 6, and 7.

## SKILLS AND ABILITIES

---

**Languages:** Malay (Native, Expert), English (Intermediate - Conversational & Written)

**Soft Skills:** Leadership & Discipline, Time Management, Teamwork & Collaboration, Communication Skills, Adaptability & Learning Agility

**Mobile & Web Development:** Flutter, Angular, NestJS, Express.js, Node.js

**Programming Languages:** C, JavaScript, TypeScript, Dart, HTML

**Database Management:** Firebase, MariaDB, MSSQL

**Tools & Software:** VS Code, Android Studio, Google Sites, Microsoft Word, Microsoft Excel, Cursor, Codex, Claude

## REFEREES

---

### **Dr. Nurdiana Azizan**

*Lecturer, Faculty of Science and Technology, Universiti Sains Islam Malaysia*

+6013-343 3103 | nurdiana@usim.edu.my

### **Muhammad Syahril Shahiran bin Rozali**

*Senior Researcher, Telekom Research & Development Sdn Bhd, Lingkaran Teknokrat Timur, Cyberjaya, Selangor, 63000*
